Joshua Manuel

Full-Stack Developer — Web & Mobile

Pasay City, Philippines | +63 945 652 5799 | joshuamanuel052204@gmail.com

SUMMARY

Full-stack engineer focused on the end-to-end design and delivery of web and mobile applications — from database schema to production UI. With a strong supporting foundation in database administration and RESTful API design, I build reliable, scalable systems that solve real organizational challenges. Hands-on delivery experience spans a government-grade procurement monitoring system at the Bureau of the Treasury through to a thesis-level legal research platform, architected from the ground up as a full-stack Laravel application.

EXPERIENCE

Full-Stack Developer & Database Administrator Aug 2025 – Feb 2026

Bureau of the Treasury — Database Administration Division *On-the-Job Training · Philippines*

- Designed and delivered a production-grade government procurement monitoring system adopted by the division to replace manual, spreadsheet-based workflows across fiscal years.
- Architected the PostgreSQL relational schema across three core tables (users, projects, audit_logs), with JSONB columns for accountable persons, Bids & Awards Committee data, and contract execution records.
- Implemented three-tier role-based access control (Admin / Officer / Viewer) enforced at the middleware layer, ensuring route-level security regardless of URL manipulation.
- Built a real-time audit trail using Eloquent model observers that capture old and new field values as JSON snapshots on every create, update, delete, and restore event — with IP address and user agent logging.
- Delivered multi-fiscal-year project lifecycle tracking with multi-dimensional budget fields (NEP, Adjusted, ABC, Contracted, Savings categories), soft-delete with full restoration, and CSV report export.

Stack: Laravel 12, PHP 8.2, PostgreSQL, Supabase, Alpine.js, Tailwind CSS, Vite

PROJECTS

Government Procurement Monitoring System 2026

OJT Project · Bureau of the Treasury — DAD *Full-Stack Developer & DBA*

- Centralized procurement lifecycle management for hundreds of active government projects across fiscal years, replacing unstructured manual workflows.
- Designed audit_logs with denormalized project fields so deleted-record history remains fully queryable after soft-deletion.
- Delivered compliance-grade CSV export and budget visualization dashboards used for official government reporting.

Stack: Laravel 12, PHP 8.2, PostgreSQL, Supabase, Alpine.js, Tailwind CSS, Vite

Philippine Labor Law Case Research Platform 2026

Undergraduate Thesis *Full-Stack Developer*

- Architected a full-stack Laravel MVC application from the ground up, covering server-side routing, service-layer business logic, PostgreSQL data modeling, and a responsive Tailwind CSS frontend.
- Built a server-side PDF extraction pipeline that parses uploaded case documents and pattern-matches against 14 legal signal definitions for automatic form pre-fill.
- Engineered a rule-based PHP scoring service that weights each legal signal and computes a normalized 0.0–1.0 outcome confidence score with no external runtime dependencies.
- Designed a normalized case_analyses table with JSON columns for nested signal breakdowns and legal doctrines; implemented full-text search, filtering, CSV export, and DOMPDF report generation.

Stack: Laravel 12, PHP 8.2, PostgreSQL, Tailwind CSS 4, DOMPDF, Vite

Personal Portfolio Website 2026

Personal Project *Full-Stack Developer*

- Built a single-page developer portfolio using Next.js 15 and TypeScript with a Prisma + PostgreSQL contact form backend and dynamic project case study pages.

- Implemented interactive UI features including a canvas dot grid, magnetic animations via Framer Motion, and a KBAR command palette for keyboard navigation.

Stack: Next.js 15, TypeScript, Tailwind CSS, Prisma, PostgreSQL, Framer Motion

SKILLS

Languages

TypeScript, JavaScript, PHP, Python, Java, C#, Kotlin, C/C++, VB.NET

Frontend

React.js, Next.js, HTML5, CSS3, Tailwind CSS, Alpine.js, Blade / Vite

Backend & Frameworks

Node.js, Laravel, ASP.NET Core, .NET Core, .NET Framework, Flask, Express.js

Databases

PostgreSQL, MySQL, SQL Server, Supabase, Firebase

Mobile

React Native, Expo, Android Studio, .NET MAUI

Tools

Git, GitHub, Docker, Postman, Figma, Unity

CERTIFICATIONS

IT Specialist — Java May 2024
Certiport / Pearson VUE

Visual Graphic Design — National Certificate III December 2023
Technical Education and Skills Development Authority (TESDA)

IC3 GS5 — Computing Fundamentals January 2023
Certiport / IC3

EDUCATION

Bachelor of Science in Computer Science 2022 – 2026
Lyceum of the Philippines — Manila

Consistent Dean's Lister — 3× Gold, 2× Silver
